

Titlis Kids Product sheet

Kids and youngster bed Titlis Kids

Children and young people grow in their sleep. The futon spring element with the Titlis Kids upholstered bed provides the ideal sleeping environment for children and young people. The Titlis Kids upholstered bed impresses with its simple design and can be individually supplemented at any time with a padded headboard to add some new pep to the children's room.

Bones, joints, and the spine can only grow healthily and straight if children are lying well and straight in bed, even if they are moving while they sleep. A human needs sufficient sleep to reach his or her intended genetic size. The bed must support natural movement during sleep without influencing the person's sleep. Only in this way can the spine develop naturally. If children lie in bed incorrectly, this can result in the person having back problems as an adult.

Our futon spring element ideally adapts to the physique and weight of the person who is asleep. The musculoskeletal system of children and young people is ideally supported, and due to its unique structure, your child sleeps in a comfortable climate. We at Hüsler Nest are convinced that children should also sleep in the best possible environment.
