- + Adapts to the sleeping person regardless of weight, height and build.
- + Customised settings – a bed that adapts to your physical needs!
- + Individually replaceable elements

The unique natural bed that grows with the challenges of life.

For the love of nature and health

Anyone who says «Sleep well!» must also say «in your Hüsler Nest». Because anyone who has long believed that a restful night's sleep only requires a simple bed frame and mattress will find out with Hüsler Nest what it means to fall asleep, sleep through the night and sleep soundly.

Many people still underestimate the effects of sleep deprivation on their health. At night, our body is busy fighting inflammation, initiating regeneration processes and processing the experiences of the day. If you like, sleep is the most important protective shield against illness of any kind. It is essential for the well-being of our psyche, as long as we do not disturb our body in this work. The wrong mattress, an uncomfortable pillow, a duvet that is too warm or too thin or a squeaky bed are just a few examples that can jeopardise deep, continuous and high-quality sleep. Circumstances that many people resign themselves from too quickly and completely forget what it means to fall asleep, sleep through the night and sleep soundly. We are convinced that sleep must be given a higher priority again and that sustainably produced, naturally treated products not only benefit the environment, but also have a profoundly positive effect on people's sleep and well-being.

Hüsler Nest sleeping system versions

The centrepiece of all Hüsler Nest natural beds is the unique Liforma spring unit. It distributes the pressure evenly over the entire lying surface. This means that it adapts to every person and body, regardless of size and weight.

Liforma «Original» – with simple logic to a unique solution.

In this version, all four components of the Hüsler Nest sleeping system are separated from each other: Overlay, natural latex mattress, Liforma spring unit and frame insert. This design, reduced to the essentials, has proven its worth for over 40 years. You have a choice of different frame inserts, mattresses and overlays.

- 1 **Overlay**
«Climate-regulating element»
- 2 **Natural latex mattress**
«Softening element»
- 3 **Liforma spring unit**
«Supporting element»
- 4 **Frame insert**
«Load-bearing element»

«Original»
especially easy to clean

«DeLuxe»
perfect finish

«Designa»
for the box spring look

Durability down to the last detail

- + fits every bedstead
- + 10-year full warranty on Liforma
- + all elements individually replaceable

Natural materials

- + certified quality
- + free from toxins
- + breathable
- + easy to clean

Adjusting to your body

- + irrespective of your size and weight
- + ergonomically perfect
- + individual adjustments possible

Liforma «DeLuxe» – where aesthetics and functionality come together.

The «DeLuxe» version is based on the traditional Liforma «Original» sleeping system. The difference is that in the «DeLuxe» version, the overlay and mattress form a single unit together with a cover. The two elements are joined together with a zip and can therefore be easily separated for cleaning or ventilation. This means that the «DeLuxe» not only has visual advantages.

Liforma «Designa» – a modern compact solution for frameless beds.

The «Designa» version is characterised by its modern style. This system gives the bed a box spring look and is ideal for frameless beds in particular. The structure is identical to that of the Liforma «Original», but the Liforma spring unit, mattress and overlay are combined in a single cover. The integrated coconut bamboo panel ensures stability and the perfect look. The overlay is also connected to the mattress cover by a zip and can be easily detached for maintenance.

Frame inserts: with or without motor

Sleep flexibly, wake up refreshed. When movement and sleep become a challenge, an adjustable bed can make all the difference.

The frame insert is the supporting element in the structure of Hüsler Nest sleeping systems. It provides the stability and base for the flexible Liforma spring unit to work perfectly. The motorised frame insert offers maximum comfort for different body zones. With a simple push of a button using a wireless hand-held transmitter, the mattress base can be easily adjusted to bring the upper and/or lower body into a comfortable and relaxing position that meets your personal needs.

Basic frame

Frame insert fixed

Frame insert with adjustable backrest or adjustable back- and leg rests

Frame insert with 1 motor

Frame insert with 2 motors

Frame insert with 2 motors Plus

Frame insert with 4 motors

The motorised frame inserts offer infinitely variable elevation of the upper body and legs, allowing the respective areas to be adjusted independently of each other. The automatic frame insert is available with one, two or four motors. With the 4-motor model, the head, back, upper and lower leg areas can be adjusted separately. The 4-motor frame, which is even equipped with an aisle light, is simply worth its weight in gold, especially for reading or watching films. The models equipped with two motors allow the seat and leg area to be adjusted. The 2-motor Plus version is available with an additional bend in the lumbar region. The two and four-motor models offer the option of saving two popular positions as favourites. The frame insert with 1 motor is equipped with a wired remote control for raising the upper body. The variant is also available as a retrofit model for the fixed and adjustable backrest frame insert model. In addition to the motorised construction, all frames are made of 100% natural, solid beech, aspen and alder wood, ensuring optimum breathability and enormous stability.

Discover frame inserts

As you make your bed, so you lie in it.

Mattresses play a major role within the Hüsler Nest systems, especially when it comes to cosiness, nest feeling and comfort. You can find out which mattress suits you best during a detailed consultation with your Hüsler Nest partner. Trained staff and the opportunity to try out your favourite sleeping position will help you choose from the wide range on offer.

The 2Flex, Firm and Honey mattresses harmonise perfectly with all Hüsler Nest sleeping systems.

Natural latex mattress 2Flex Wave 18 cm

- > Only suitable for conventional slatted frames
- > Only available in the DeLuxe version
- > 100% natural latex milk from sustainable cultivation
- > Manufactured using the high-quality Talalay process
- > Two degrees of firmness (soft, medium):
Hardness can be selected by turning
- > Five-zone wave structure with shoulder drop for optimum comfort
- > Suitable for people who sleep on their sides and are sensitive to pressure
- > High point elasticity
- > High air permeability
- > Durable and resistant
- > LGA durability test, 100 out of 100 points achieved

Why is the Hüsler Nest overlay separate from the mattress?

Our overlays lie on top of the mattress but are separated from it. They ensure that the temperature in your bed does not cool down and that moisture is quickly wicked away. This means you sleep in dry conditions all night long.

Another plus: the overlay can be easily removed for airing, maintained and replaced later.

Topper Original/DeLuxe/Designa 3 cm

- > 100% natural latex milk from sustainable cultivation
- > Manufactured using the high-quality Talalay process
- > Simple raising of the mattress by 3 cm
- > Increase in sleeping comfort
- > Body tissue and veins are protected from pressure points
- > Particularly suitable for pressure-sensitive people, e.g. rheumatism
- > LGA durability test, 100 out of 100 points achieved

Topper Original

- > Topper cover tricot in 100% cotton with a zip
- > Topper is placed on the mattress

Topper DeLuxe/Designa

- > Topper is integrated into the overlay
- > Topper cover with zip made of 100% cotton
- > Topper and mattress cover are connected with a zip
- > Material of the overlay: virgin sheep's wool or cotton-linen

Overlays: comfort and temperature regulating

The Hüsler Nest overlays ensure that your skin stays dry by quickly releasing moisture from perspiration into the environment.

Original overlays Virgin sheep's wool, cotton-linen

- > Overlay for the unique nest feeling
- > High-quality natural materials
- > Two filling quantities available for virgin sheep's wool
- > Attached to the mattress with elastic bands at the corners
- > Optimum air permeability
- > Very easy to care for
- > Virgin sheep's wool is self-cleaning
- > Cotton-linen washable (gentle cycle 40 °C)

- > Attachment to the mattress cover with zip fastener
- > Optimum air permeability
- > Easy to maintain
- > Virgin sheep's wool is self-cleaning
- > Cotton-linen washable (gentle cycle 40 °C)

Duvets: more than just a source of warmth

Wrapping yourself in a duvet can feel like a huge hug – if you have the right one. Made exclusively from sustainable materials, our duvets warm body and soul. They are available in two different warmth levels and can be freely combined with each other using the practical connection called «loopies».

Virgin sheep's wool/tricot

Breathable and perfect if you sweat at night. The duvet absorbs over 30% of the moisture and releases it into the air.

- > 100% Swiss virgin sheep's wool
- > Perfect nest feeling
- > Very permeable to air
- > Suitable for people who are sweating profusely and who feel too hot in bed
- > Self-cleaning

Virgin sheep's wool/satin

Pamper your skin with this fine duvet. The tightly woven satin fabric optimally retains the warmth of the virgin sheep's wool.

- > Cuddly soft
- > Suitable for people with a normal sensitivity to heat
- > Self-cleaning

Virgin sheep's wool tricot

Virgin sheep's wool satin

Camel hair satin

Alpaca batiste

Cotton-linen satin

Camel hair/satin

Thanks to the camel hair fluff, you will sleep like a thousand and one nights. This duvet is cooler in summer and slightly warmer in winter.

- > Luxurious comfort
- > Noble and light
- > Perfect for switching from down to wool
- > Self-cleaning

Alpaca wool/batiste

Feather-light feel, yet warm and dry. Perfect for switching from down to wool. Cover made of fine cotton batiste.

- > More warmth with less weight
- > Pure Swiss alpaca and virgin sheep's wool
- > Self-cleaning

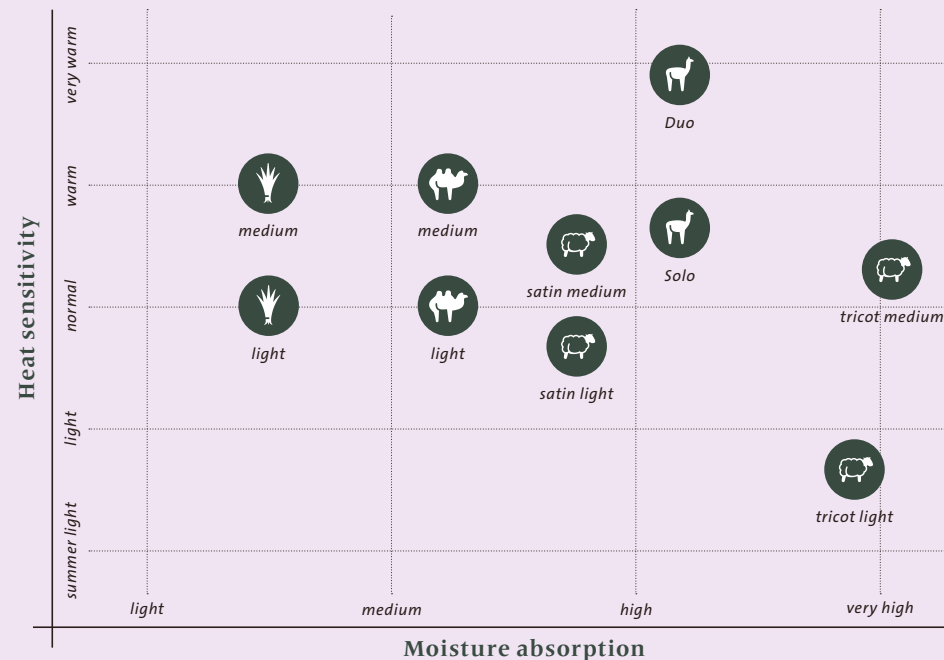

Cotton-linen/satin

A purely plant-based duvet – that's possible. It is dirt-repellent and antibacterial, and also reliably neutralises odours.

- > Allergy-friendly
- > Vegan
- > Washable (gentle cycle 60 °C)

Our duvets compared

This categorisation is based on guide values. Individual perceptions may differ.

Pillows: maximum lying comfort

Thanks to the variable inner system (VIS), our pillows offer you what you always need: a good night's sleep. Our pillows are made exclusively from natural, breathable materials.

VIS pillow case
Virgin sheep's wool tricot

- > Breathable and moisture-regulating
- > Self-cleaning
- > Cover made from 100% cotton
- > Filling with 100% virgin sheep's wool

Pillow case virgin sheep's wool tricot

Pillow case cotton-linen satin

VIS pillow case
Cotton-linen satin

- > Washable (gentle cycle 60 °C)
- > Allergy friendly
- > Cover made of 100% finest cotton satin
- > Filling with 60% cotton, 40% finest Belgian linen

VIS fillings

In addition to two different cases, you can choose from six different fillings. The different fillings can be freely combined with each other. So you will always find the perfect pillow.

- > 100% virgin sheep's wool
- > 100% virgin sheep's wool with stone pine shavings
- > 60% cotton, 40% linen
- > 100% natural latex as moulded core

Other fillings

This filling in the cotton tricot cover has a practical zip. This allows the filling quantity to be adjusted to personal requirements.

- > 100% natural wool balls
- > 100% latex sticks

Hüsler neck support pillows: Ergonomically perfectly designed

You can customise the two neck support pillows to suit your condition, mood and physique: for a regenerating sleep like on cloud nine.

Neck support pillow Virgin sheep's wool

This neck support pillow adapts perfectly to the shape of your head thanks to its two chambers. The smaller chamber is firmer, the larger one is softer. The moisture-regulating characteristics of the wool prevent your head from sweating. If the pillow is too hard or too soft, you can remove or add wool balls as required thanks to the zip.

- > Pillow case made from 100% cotton
- > Filled with wool balls made from 100% virgin sheep's wool

Neck support pillow Natural latex

This ergonomically shaped neck support pillow with a high-quality core made of 100% natural latex adapts perfectly to your needs thanks to its wave shape. It can be individually adjusted in height thanks to an additional integrated 3 cm high insert.

- > Pillow case made from 100% cotton tricot
- > Filling with 100% Talalay natural latex, ergonomically moulded
